16. Defendant's advertisement of its Chase Mobile App informs users that they can scan the QR through their smartphone to download the app. On information and belief, at least through internal testing, Defendant has used a digital image capturing device of a portable electronic device, such as the camera component of a smart phone for example, to capture a digital image of the QR code associated with the advertisement of Defendant's Chase Mobile App.

18. For example, if a user scans a QR code in the advertising associated with Defendant's Chase Mobile App, scanning technology decodes the pattern of the QR code to obtain a decode string and sends the decode string to a remote server. The server returns information associated with the QR code. In this example, the information received by the user and displayed on the portable electronic device is information about Defendant's Chase Mobile App including descriptions of the app, screen shots, reviews and a link to download the app. The information is illustrated, for example, with a website at:

<https://play.google.com/store/apps/details?id=com.chase.sig.android&hl=en>

and the information displayed is illustrated by the partial screen shot below.
